

TCNJ Panhellenic Fall Recruitment Guidelines 2015-2016

- A chapter is eligible to recruit in the fall if and only if their chapter total is under Panhellenic total, which is reset to the chapter average each semester. Fall-recruiting chapters may recruit up to total and no further (i.e. if ABC's roster is 72 women and Panhellenic total that fall semester is 76 women, ABC may recruit 0-4 new members.)
- A PNM is only eligible for fall recruitment if she has a minimum of 12 TCNJ approved credits (3 units earned at TCNJ or at another school that transfer to TCNJ) and a minimum GPA of 2.5
- Freshman are not allowed at any fall recruitment event that isn't a general Interest Session approved by Panhellenic Council
 - For example: If an organization has a Bid Day Ceremony for their new members, freshmen can not be in attendance
- Bids can not be handed out at an Interest Session where freshmen are present
- Preference Ceremonies are permitted, but not required (freshmen may not be present at fall preference ceremonies)
- New Member Education programs need to be approved by Dave before the New Member activities begin
 - We highly suggest getting an email from Dave saying it is approved, so you have some kind of written confirmation
- Grade checks are to be completed before bids are given out
- New Members must be initiated within 6 weeks of bid acceptance where bid acceptance is defined as signing the bid acceptance form and the new member agreement in the Panhellenic Advisor's or a Panhellenic Vice President Recruitment's presence.
- All new members must complete the hazing prevention workshop with the Panhellenic Advisor prior to participating in the chapter's new member program.
- All pre-formal recruitment rules (listed in the official formal recruitment rules) still apply in regard to first-semester freshmen. And once a chapter has recruited to total, its fall recruitment activities must cease (i.e. the chapter may not recruit to quota and then bid promise any remaining PNMs that may register for formal recruitment in the winter)
